Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5, 7, 8 and 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grot in view of Burney, Jr. et al.

Grot discloses processes for separating perfluorinated ion exchange polymers having sulfonic acid groups from perfluorinated ion exchange polymers having a carboxylic acid group. These processes comprise contacting the membrane with a mixed aqueous alcohol solvent to dissolve the sulfonic acid functional polymer followed by filtration or centrifugation. The carboxylic acid group polymers are taught as being produced from the salt form when desired by contacting with acid. Applicants' claimed polymers of instant claims 7 and 8 are seen as met by the reference polymers, TFE/EVE and TFE/PSEPVE. Applicants' claimed solubility properties are seen as inherent to the solvents of the reference since their chemical nature meets that specified in the instant claims. This reference fails to explicitly recite a step for removing inorganic particles.

The reference to Burney, Jr. et al, however, teaches similar processes for recovering ion exchange polymers wherein the polymer material is first contacted with a solvent for the inorganic particles for their removal before the dissolution of the polymer.

Art Unit: 1714

Therefore, it would have been obvious to one of ordinary skill in the art to pretreat the membranes of the primary reference to remove inorganic particles as taught by the secondary reference followed by the process steps of the primary reference.

Claims 2, 4, 6 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
